

Exercise No. 4

Name: Jericho Francisco

Grade:

Course/Section: BSCPE 4B

Date: September 5, 2026

Machine Problem:

Create a program that will display the output format shown below. Save the program using Exer4.asm as the filename.

AaBaCcDdEeFf Zz

Program:

```
ASM EXER4.ASM X
ASM EXER4.ASM > ...
1  .model small
2  .stack
3  .code
4  start:
5      mov ah, 02h
6      mov cx, 26      ; A to Z = 26 letters
7      mov bl, 41h     ; uppercase counter, starts at 'A'
8      mov bh, 61h     ; lowercase counter, starts at 'a'
9  ulit:
10     mov dl, bl
11     int 21h          ; display uppercase letter
12     mov dl, bh
13     int 21h          ; display lowercase letter
14     inc bl           ; advance uppercase counter
15     inc bh           ; advance lowercase counter
16     loop ulit
17     mov ah, 4ch
18     int 21h
19 end start
```

Output:

```
